

# **Endolift e liposuzione: confronto istologico per il lipofilling**

**Roberto Ruffa**

Si analizzano prelievi provenienti da tessuto adiposo ricavato dalla lipoaspirazione chirurgica e da procedura di laserlipolisi con metodica endolift per valutarne validità nell'impiego come lipofilling

## **Endolift and liposuction: histological comparison for lipofilling**

Samples from adipose tissue obtained from surgical lipoaspiration and from laserlipolysis procedure with endolift method are analyzed to assess their validity in use as lipofilling
