

Male Lip Filler: una nuova sfida per il Medico Estetico

Eleonora Iachini

Le labbra giocano un ruolo fondamentale nell'estetica del volto. Acido ialuronico e filler sono ampiamente usati per l'aumento del volume delle labbra femminili ma pochi uomini si avvicinano a questo trattamento per la paura di femminilizzare i propri tratti.

Male lip filler: a new challenge for aesthetic doctor

Lips play an important role in facial aesthetics. Hyaluronic acid fillers have been widely used for lip augmentation in females but very few men seek this treatment due to the fear of feminization of lips. However, there are very few case reports published for correction of lips using fillers in men.
